## **BOOK SYNOPSIS**

This revision is designed for a first or second course in Java programming, this text covers JDK 1.3, the newest version Java 2, principles of programming, and core Java features. In order to help students develop programs more productively and to learn Java more effectively, the features of JBuilder are covered in relation to the topics in each chapter. A step-by-step approach first lays a sound foundation on programming elements, control statements, and methods; then introduces object-oriented programming; moves on to graphics programming; and concludes with advanced features that enable students to develop comprehensive programs. Representative examples, abundant pedagogy, and multiple exercises provide students with an outstanding introduction to Java. The book covers all the subjects required in the Level 1 Java Certification Exam.
