BOOK SYNOPSIS

A documented, theological work of epic proportions seeks to comprehend thousands of years of Human history by revealing an awe-inspiring, living cosmos and the Divine plan to restore fallen Humanity to its original grace. Underscoring this unprecedented evolution of God and Man, esoterica scholar Daniel Briggs brings to light the scientific foundations supporting sacred calendar convergences currently taking place this decade, turning point in our 26,000-year history. Although many people have become aware of the Mayan calendar now that 2012 has passed, many more are unaware that an "Age" is scientifically measurable and, as such, is truly ending, so that another can begin. According to Briggs, our Solar calendar distinguished by four seasons, each enfolding three months, synchronistically emulates the Precessional Year, an astronomical 25,920-year megacycle composed of four distinct 6,480-year Epochs (Yugas), each of which enfolds a trinity of 2,160-year Ages (Aeons). As all these superimposed cycles are coming to a close simultaneously, transformational times are upon the Human Race. Uncannily prescient, "The Purification Papers" shows readers exactly how ancient faiths, philosophies and forgotten prophecies highlight the culminating fourth "Kali Yuga" Epoch, and the Age of change and growth that is evident all over the world. Daniel Briggs spent more than 20 years immersed in research, carefully studying and deciphering numerous important scriptures and scientific texts in order to bring this illuminating book to readers. Defying genres and effortlessly interweaving the significant prophecies of Nostradamus, Edgar Cayce and the Hopi Elders with religious scriptures of ancient Judeo-Christianity, core precepts of messianic Mahayana Buddhist sutras and the heady physics of Zero Point Energy, Dark Matter and the Akashic Multiverse, Briggs has condensed his research and bound it in a cohesive, understandable and clear manuscript - an esoteric history for anyone who is seeking to know more about the Age they are living in. "We, too, suspend our disbelief long enough to acknowledge the "possibility" of a living, anthropomorphic God ("Tathagata" in Buddhist nomenclature) and find ourselves better prepared to deal with the ephemeral birth pangs necessary to usher in a brave new world," says Briggs, who developed the book based on articles he contributed to the newsletter of Mandala Books, a well-known metaphysical and spiritual bookstore in Northern California. Excerpt: "The balance of power has stabilized somehow, but the pendulum will soon finish its swing. Of course, its not considered good manners to point out the obvious infection, the disease, but its vitally important to see the big picture, so as not to despair when things get ugly. What we dont know "can" hurt us, since we might give up too soon. Castanedas warrior knew first of all, "that he is waiting," and secondarily, "what he is waiting for." Hesses Siddhartha had all the necessary skills for Life: he could think, fast and "wait." The Kali Yuga must run her fixed course and, as with the Borg, resistance is futile-we must wait, but with absolute certainty of what we are waiting for. Blind faith wont do in a modern age. The incredible anxiety that grips our Civilization today is the subconscious knowledge that we are indeed wrapping up the grand Human experiment of free will. Those who have trod upon the straight and narrow, though sidetracking through some colorful landscapes with Lucy in the sky, need not get caught up in the morphic field of fear that is manifesting. * [See Proverbs 3.25] We have but to wait..."
